President's Letter

As the 2014 Denver Regional draws to a close we are nearing 2,100+ tables.

Our Pro/Am game was a big hit this year, with 56 tables in play. **Shelbie Bastiaans, Penny Coffman and Flo Newlin** coordinated this event again this year. Well done.

On behalf of all our players at this year's regional, we thank **Gary Zeiger**, Director in Charge and his directing staff.

The Regional Committee was chaired by **Bill Beard**. **Jerry Ranney** helped with the regional schedule and setup, **Joan Mager** did an excellent job as Charity Chairman, **Jeanne Achziger** worked tirelessly to organize the registration desk and provide candy all week. Partnership chair, **Shirley Hein-**

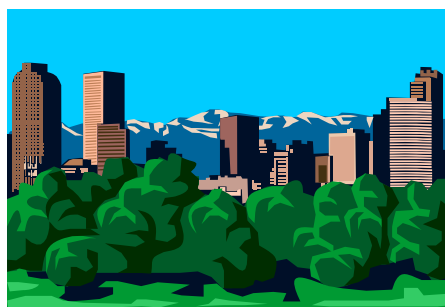

sohn, matched up partners throughout the tournament. **Sheryl Siegel**, our Paparazzi, took photos of the latest winners and new life masters. **Marilyn Ballon**, Caddymanager, got us a great group of caddies. **Lori Beard** was our Treasurer. Thanks to **Carolyn Newcomb**, Bulletin editor, for publishing the Daily Bulletin each morning and producing all the personalized labels. Thanks to our webmaster, **Margaret Devere** for publishing the newsletter and linking to BridgeResults.net. A special thanks to **Bill Michael** for putting the results of the regional events and hand records on BridgeResults.net. CHECK IT OUT !!

Our thanks to all of the volunteers from Denver Unit 361 who worked at the following venues: registration desks, partnership desk, photography, room setup.

Our speakers covered some excellent topics and the lectures were well attended.

You, the players, have made this a successful tournament. We hope you had fun and will come back soon.

*Joan Kuschner,
Unit 361 President*

Make plans now to come back for our 2015 Regional Tournament May 19-25.

And Even More Brain Trivia:

Did you know that you have 15 times more neurons in your brain than there are people on the planet?

Scientists have identified the "oops" center of the human brain. There is a specific region of the brain that reacts when you realize you have made a mistake.

It was long believed that emotion and reason were two separate functions of the brain. We now know that emotion is essential to our overall mental health. Why else would physical brain malfunctions cause emotional pain and depression and positive changes effect happiness and laughter?

In most adults, the language center of the brain is in the left hemisphere. But babies up to a year old respond to language with their entire brains, allowing them to acquire language skills at an impressive rate.

Scientists have identified the specific region of the brain that causes laughter.

Only 4 weeks after conception, a human embryo's brain is developing at an astonishing rate. At this stage the first brain cells in the body, neurons, are forming at a rate of 250,000 every minute.

Many people believe that Albert Einstein had a huge brain, but this is false. He was actually a small person with a smaller than average size brain. Einstein's great intelligence came from the huge number of connections that were formed between his many brain cells, which happened every time he learned something new.
